**Skills:** Javascript, Node.js, React.js, Express, PostgreSQL, Prisma, Firebase, PERN, CSS, TailwindCSS, Git, Heroku

---

**Freelancer | Hayward, CA**

**Web Developer**

07/24 – Present

- Build responsive and visually appealing websites using HTML, CSS, JavaScript, and TailwindCSS, focusing on user experience and modern design.
- Use Git for version control to collaborate with clients and track project progress, ensuring efficient development and code management.
- Develop dynamic web applications using the PERN/PEN stack (PostgreSQL, Express.js, React, Node.js) for full-stack development, enabling you to manage databases, build APIs, and create interactive user interfaces.

**Golden Jewelry and Repair | Castro Valley, CA**

**Goldsmith and CAD Designer**

01/16 – Present

- Utilize advanced CAD software (ArtCam) to design detailed 3D models for custom jewelry, ensuring precision and manufacturability.
  - Create intricate and aesthetically appealing jewelry pieces, specializing in a range of styles, from traditional to contemporary designs.
  - Developed and executed social media strategies, creating engaging content to showcase jewelry collections, drive customer engagement, and grow the brand's presence on platforms like Instagram and Facebook.
- 

**Portfolio Website**

**HTML, CSS, Javascript, TailwindCSS**

- Designed and developed a responsive personal portfolio website using HTML, CSS, JavaScript, and TailwindCSS to showcase projects and skills, featuring a clean, modern layout with interactive elements and optimized for both desktop and mobile viewing.

**Hellhole IO – Google Drive Clone**

**HTML, CSS, Javascript, TailwindCSS, PostgreSQL, Prisma, Node.js, Express**

- Developed a full-stack web application replicating core Google Drive functionalities, including file upload, storage, and sharing features.
- Utilized the PEN stack (PostgreSQL, Express.js, Node.js) for backend services, ensuring secure and efficient file storage and retrieval.
- Implemented a dynamic front-end interface using HTML, CSS, and JavaScript, enabling smooth file management and real-time user interactions.

**Golden Jewelry and Repair Website - In Development**

**HTML, CSS, Javascript, TailwindCSS**

- Built a fully responsive website for a jewelry repair shop using HTML, CSS, JavaScript, and TailwindCSS, featuring an elegant design with clear service descriptions and customer testimonials to enhance user experience and drive business engagement
-
